Clarke®

Cleaning Power Since 1916.

Clarke® PBU Burnishers Provide Powerful Results with Superior Dust Control

When you need floor equipment to quickly burnish large surface areas to a high gloss, turn to the manufacturer who provides the most power available.

Clarke® propane-powered burnishers are available in 21-inch and 27-inch path sizes, so you can choose the best match for your productivity needs. The Dust Control Series also offers superb dust control which is often critical for retail stores, office buildings, educational institutions, supermarkets and sports facilities.

All models have Kawasaki Twin-V engines that provide maximum power.

Large 20 lb. 80% safety fill propane tanks offers long working time between refills and also prevents overfilling.

Balanced pad drivers reduce vibration and are flexible to follow the contour of uneven surfaces over floors.

The Dust Control series offers a unique floating shroud that directs the high velocity airflow near the floor to collect six times as much dust as competitive models.

Automotive style air filter for improved indoor air quality. Dust Control system extends pad life by preventing particle build-up in the pad.

Control panel lights inform operator of emissions controls and engine performance. Planned maintenance intervals are easily monitored with the on-board hour meter and the standard key-ignition switch prevents unauthorized use.

PBU Propane-Powered Burnishers

KEY FEATURES

- Sizes and configurations for any application
- Optional features for complete versatility
- Clean and efficient catalytic converter
- Effective dust and emissions control

Height	43" (109.2 cm)								
Warranty	2 Years Parts & Labor								

WHAT ENHANCES ITS PRODUCTIVITY?

- Powerful engine maintains speed under heavy loads
- Flexible pad driver follows contour of uneven floors
- Large 20-pound (9-kg) propane tank offers long working time between refills
- Effective dust control eliminates dust on merchandise, reduces pad build-up

WHAT DOES IT DO BEST?

- Accomplishes high-gloss burnishing with the most power available
- Completes large areas fast for high productivity
- Reduces operator fatigue with ergonomic comfort
- Easy to maintain

WHAT ARE ITS OPTIONAL FEATURES?

- 80% safety fill, polished a tank
- Carbon monoxide monitor
- Tank storage cages

WHAT ARE ITS SAFETY FEATURES?

- Catalytic converter for clean air exhaust
- "Carb Gard" emissions monitor
- 80% safety fill tanks prevent overfilling
- Safety certification program
